Tata Electronics signs tech pact with US chip firm for Dholera fabrication plant
New Delhi: Tata Electronics on Tuesday signed a memorandum of understanding (MoU) with California-headquartered semiconductor design and engineering firm Synopsys, to collaborate on various technological verticals. The partnership will see Synopsys' offerings being used in Tata Electronics' upcoming \$10.8-billion semiconductor fabrication plant, or fab, in Dholera, Gujarat, which was announced on 29 February.

DIRECTOR'S NOTE

At DeepBuildwell, our journey has always been fueled by a singular belief — that real estate is not just about land or buildings, but about creating a foundation for futures. From our very first project, we have remained committed to developing spaces that offer more than just investment value — they offer vision, growth, and opportunity. As India steps into a new era of urban transformation, especially with revolutionary projects like Dholera Smart City, we are proud to be among the early movers shaping that landscape with purpose and precision.

Our focus is not only on delivering high-potential properties, but also on building trust through transparency, timely delivery, and customer-first thinking. We believe that every investor deserves more than returns — they deserve reliability, innovation, and a partner they can count on. DeepBuildwell is that partner. We thank our clients, partners, and team members for walking this journey with us, and we remain committed to building a smarter, stronger future together.

Mr. Dharmender Saini
Director

WHY INVEST IN DHOLERA SIR

DHOLERA SIR MASTER MAP

ABOUT DHOLERA

Dholera SIR (Special Investment Region) is India's first greenfield smart city, strategically planned under the Delhi-Mumbai Industrial Corridor (DMIC) initiative. Spanning 920 sq. km in Gujarat, it features world-class infrastructure, plug-and-play industrial zones, an upcoming international airport, and integrated transit systems. Backed by central and state governments, Dholera is designed to be a high-efficiency, low-carbon economic zone that offers exceptional potential for industrial, commercial, and residential investment.
